ABSTRACT

Drug induced immune thrombocytopenia is a serious life-threatening clinical condition, the diagnosis of which is often very difficult, and mainly performed on clinical criteria and rarely on confirmatory laboratory tests. A 52-year-old male, post Covid-19 patient, admitted to the hospital for the management of severe vomiting and abdominal pain, developed sepsis, and started with meropenem as an empirical anti-microbial agent. After two days of therapy, the patient presented

MINHAT TALEEMIIYAH

A photograph of a person standing in a small boat on the ocean at sunset. The sun is low on the horizon, creating a bright orange and yellow glow that reflects on the water. The person is silhouetted against the bright sky. The boat is dark and appears to be a traditional wooden boat. The overall mood is peaceful and contemplative.
